State the output of the following Java code snippet:

```java
String s = "4564";
try {
    int num = Integer.parseInt(s);
    int arr[] = new int[5];
    for (int i = 0; i < 10; i++) {
        System.out.println(arr[i]);
    }
} catch (NumberFormatException e) {
    System.out.println("Number format exception");
} catch (ArrayIndexOutOfBoundsException e) {
    System.out.println("Array index out of bounds");
} catch (Exception e) {
    System.out.println("Exception");
} finally {
    System.out.println("From the finally block");
}
System.out.println("I am fine now!");
```

Output:
0
0
0
0
0
Array index out of bounds
From the finally block
I am fine now!
